

**Fire and water can be
an explosive combination**

FIRE-RESISTANT SAFETY GLASS FROM VETROTECH SAINT-GOBAIN

In the offshore industry safety is a top priority. Your people and equipment require the strictest safety measures. Vetrotech Saint-Gobain is the world's leading specialist in fire-resistant safety glass. Our products are made with your responsibilities in mind. We test our glass over 500 times a year (!) under the most hellish conditions. As a result, you can trust our advice and quality.

Offering excellent safety in several aspects, such as noise reduction, insulation, privacy, sunlight reduction and explosion-resistance, our fire-resistant glass has almost no limitations. And it's suitable for any application. First and foremost, it's

fire-resistant. But in most cases, glasses have to fulfil several of your needs and are therefore uv-resistant, heat-resistant and shatter-proof. And by combining glass technologies, other requirements can be added as well.

Want to know more? Order our brochure or call us if you have questions or need immediate advice about the options offered by our fire-resistant glass.

Tel: +31 (0)495-57 44 35.
