

Just how safe  
can you make a ship?

Fire at sea. You hope and trust it'll never happen. But certainty is something else. Just how safe can you make a ship? How much care can you take of passengers and crew? Our multi-functional fire-resistant glass is used worldwide to ensure safety. It buys extra time for all persons on board to abandon ship safely and professionally. It works and it has been proved to work (500 fire tests every year!). Safety and fire-safety above all, is the speciality at Vetrotech Marine. We have the knowledge and competencies. Anywhere, everywhere you plan to use glass, Vetrotech Marine offers meaningful support. Dedicated advice meeting all relevant IMO standards. Get us involved at an early stage. One call is all it takes to receive our special brochure: [+31 495 57 44 35](tel:+31495574435).
